Update on this topic. Only ConEd courses should now need to be made unavailable, at the instructor’s discretion. Students in curriculum courses are now given dates of enrollment and will not see their course until the first day of class. The course will then be automatically hidden from them a few days after the end of the semester.

Make your course unavailable to students. As soon as ConEd students are enrolled in a Moodle course, they can see whatever is visible in the course unless the course is made unavailable. This must be done manually in real time, meaning that it cannot be set up in advance to happen automatically at some future date.

1. Be sure you are on the main page of the course (the page with the numbered topics)
2. In the “Administration” block under “Course administration,” click “Edit settings”
3. Change the Visible setting to “Hide”
